I LIKE ANIMALS!

My very own storybook about animals.

Created by Screening & Intervention at Early Learning Coalition of Pinellas County, Inc.
I like animals. I like all kinds of animals because they are so cool!
I like furry & feathered animals

I like lizards and frogs

And I even like bugs too!
I like to watch them outside at my house or at my school.
Sometimes, I like to catch them gently so I can see them up close.
I put them in a special place for bugs so I can see them.
When I catch them, I make a little home for them like the one they live in outside.
After I watch them, I let them go gently.
They go back home to their families just like me.
Their families miss them when they are with me. They are always happy to go back home.
Sometimes I touch them very carefully and very gently.

I never hurt them because they are my friends.
Silk worms are very fragile, I am careful to never hurt them.
They are busy eating and growing so they can turn into an Oak silk Moth.

Their moth friends and families will be so sad if they never get to fly and play together.
We need moths to help our flowers grow.
I am very kind to animals, lizards, worms and bugs.

I like them and they like me!
Animals, lizards, frogs, worms and bugs are my friends.
